

**REMARKS/ARGUMENTS**

The Office Action mailed September 10, 2004, has been received and reviewed. Claims 1 through 10 are currently pending in the application. Claims 1 through 7 stand rejected. Applicants have amended claims 1 through 6 and 9 through 10, and respectfully request reconsideration of the application as amended herein.

**Information Disclosure Statement(s)**

Applicant notes the filing of an Information Disclosure Statement herein on July 3, 2003, and notes that no copy of the PTO-1449 was returned with the outstanding Office Action. Applicant respectfully requests that the information cited on the PTO-1449 be made of record herein and an initialed copy of the PTO-1449 be returned to Applicant's undersigned attorney evidencing the same. A copy of the PTO-1449 and a date-stamped copy of the transmittal postcard evidencing receipt of the same by the Office are enclosed for the Examiner's reference.

**Preliminary Amendment**

Applicant's undersigned attorney notes the filing herein of a Preliminary Amendment on October 9, 2003, which filing was not acknowledged in the outstanding Office Action. Should the Preliminary Amendment have failed for some reason to have been entered in the Office file, Applicant's undersigned attorney will be happy to have a true copy thereof hand-delivered to the Examiner.

**35 U.S.C. § 101 Double Patenting Rejection**

Claims 1 through 7 stand rejected under 35 U.S.C. § 101 as claiming the same invention as that of claims 1 through 5, and 7 and 8 of pending U.S. Patent Application Serial No. 10/230,654, filed on August 29, 2002. (hereinafter the '654 application) Applicants respectfully traverse this rejection, as hereinafter set forth.

The remarks of the related application 10/23064 state, "Applicant has concurrently filed an Amendment directed to U.S. Patent Application No. 10/613,277, which cancels claims 1 through 7 thereof." (emphasis added.) An amendment directed to related U.S. Patent application

No. 10/613,277 was filed on July 20, 2004, canceling claims 1 through 7 thereof. However, Applicant respectfully submits that no such amendment has been filed in the present application, U.S. Patent application No. 10/613,237 because no such amendment is necessary. The claims of the present application are not coextensive in scope with claims 1 through 5, and 7 and 8 of the '654 application.

Claim 1 of the present application, as amended herein, recites "An electronic device package comprising: a transparent substrate structure; at least one *secondary substrate* having a first surface secured to a surface of the transparent substrate structure, *a central aperture* covered by the transparent substrate structure, and *a plurality of conductive traces formed around the central aperture*, each conductive trace of the plurality of conductive traces having a first attachment point and a second attachment point on a second surface of the at least one secondary substrate; at least one optically interactive electronic device having at least one bond pad, the at least one *optically interactive electronic device mounted to the at least one secondary substrate* by a bond between the first attachment point of a conductive trace of the plurality of conductive traces and the at least one bond pad; and *a discrete conductive element* attached to the second attachment point of the conductive trace, the discrete conductive element extending outwardly from the at least one secondary substrate within an outside perimeter thereof from the second attachment point in a direction perpendicular to a plane of the at least one secondary substrate and to a level beyond a back surface of the at least one optically interactive electronic device." (Emphasis added.)

Claim 1 of the '654 application recites, "An electronic device package comprising: a transparent substrate; a plurality of *conductive traces formed on a surface of the transparent substrate*, each conductive trace of the plurality of conductive traces having a first attachment point and a second attachment point; an optically interactive electronic device having at least one bond pad, the *optically interactive electronic device mounted to the transparent substrate* by a bond between the first attachment point of a conductive trace of the plurality of conductive traces and the at least one bond pad; and *a backing cap* covering a back surface of the optically interactive electronic device, the backing cap having at least one backing cap attachment point in electrical communication with the second attachment point of the conductive trace and at least

one attachment pad on a surface of the backing cap in electrical communication with the at least one backing cap attachment point.” (Emphasis added.)

Applicants respectfully submit that claim 1 of the present application and claim 1 of the ‘654 application are not drawn to identical subject matter. For example, claim 1 of the present application is drawn to a secondary substrate having a central aperture and a plurality of conductive traces formed around the central aperture, and an optically interactive electronic device mounted to the secondary substrate. Claim 1 of the ‘654 application is drawn to conductive traces formed on a surface of the transparent substrate, an optically interactive electronic device mounted to the transparent substrate, and a backing cap. Dependent claims 2 through 7 of the present application are likewise drawn to non-identical subject matter.

It is, therefore, respectfully submitted that, under 35 U.S.C. § 101, claims 1 through 7 of the present application are allowable over claims 1-5 and 7-8 of copending Application No. 10/230654.

### ENTRY OF AMENDMENTS

The amendments to claims 1 through 6 and 9 through 10 and drawings FIGS. 6, 9, 13, and 16 above should be entered by the Examiner because the amendments are supported by the as-filed specification and drawings and do not add any new matter to the application. The drawings have been amended to address a spelling error.

### CONCLUSION

Claims 1 through 10 are believed to be in condition for allowance, and an early notice thereof is respectfully solicited. Should the Examiner determine that additional issues remain which might be resolved by a telephone conference, he is respectfully invited to contact Applicants' undersigned attorney.

Respectfully submitted,

Kirsten L. Dockstader
